SUMMARY

Final-year Computer Science student focused on machine learning and NLP. Built and deployed three end-to-end ML
projects, including a semantic search engine over 20k documents.

EDUCATION

B.Tech in Computer Science and Engineering, Vardhaman Institute of Technology (fictional), 2022 - 2026

CGPA: 8.7/10

Relevant coursework: Machine Learning, Data Structures, Probability and Statistics, DBMS

EXPERIENCE

Machine Learning Intern, Nimbus Analytics (fictional) | May 2025 - Aug 2025
• Built a text classification pipeline with scikit-learn and PyTorch that improved F1 from 0.71 to 0.84 on 40k support tickets.
• Fine-tuned a DistilBERT model using Hugging Face Transformers and served it with FastAPI and Docker.
• Automated data cleaning with Pandas and NumPy, reducing preprocessing time by 60%.
Research Assistant, University NLP Lab | Jan 2025 - Apr 2025
• Implemented named entity recognition experiments in spaCy and compared them with BERT baselines.
• Tracked 30+ experiments with MLflow and documented results for the lab.

PROJECTS

• Semantic Job Search: indexed 20,000 job posts with Sentence Transformers and FAISS; median query latency 45 ms.
• RAG Study Assistant: LangChain + Gemini API chatbot over lecture PDFs with source citations; used by 120 classmates.
• Crop Price Forecasting: XGBoost model with feature engineering on 5 years of mandi data; MAPE 8.2%.

SKILLS

Languages: Python, SQL, Java, C++
ML/AI: Machine Learning, Deep Learning, NLP, PyTorch, TensorFlow, scikit-learn, XGBoost, Transformers, Sentence Transformers
Data: Pandas, NumPy, Matplotlib, Jupyter, PostgreSQL
Tools: Git, GitHub Actions, Docker, FastAPI, Streamlit, Linux, AWS (S3, EC2)

ACHIEVEMENTS

• Winner, Smart India Hackathon 2024 internal round (team of 6).
• Published a workshop paper on low-resource Telugu text classification.
